

# Installation & Configuration in Microsoft Dynamics SL 7.0

## Course Outline – 2 days of Training

### Course Number 8831

This training material develops understanding of technologies and techniques necessary to successfully install Microsoft Dynamics SL by covering the basics of installation and setup, as well as advanced topics such as optimization. The training material builds confidence and minimizes installation time. Microsoft SQL Server is discussed as it applies to the optimization of Microsoft Dynamics SL.

The training material discusses the installation of Microsoft Dynamics SL and the installation of the related products listed in the agenda. This training material does not go into the setup and use of the Microsoft Dynamics SL application as these topics are covered within other training offered by Microsoft.

### Audience

Microsoft Dynamics SL Installation and Configuration training is recommended for people who plan to install, implement, configure, consult, or support Microsoft Dynamics SL. The training is targeted toward administrators, implementers, developers, and consultants who need to understand the technical aspects of Microsoft Dynamics SL. The training material is not intended for non-technical staff.

### Prerequisites

Before attending this training material individuals must have:

Working knowledge of Microsoft Windows 2003, or Microsoft Windows XP.

General knowledge of database applications is helpful but not required.

### At Training Material Completion

Training material completion objectives are to:

Identify the unique position of Microsoft Dynamics SL in the accounting software marketplace

Describe features, design foundations and system level support

Interpret Microsoft Dynamics SL licensing issues and the relationship with Microsoft SQL Server licensing

Describe the working relationship between Microsoft SQL Server and Microsoft Dynamics SL

Identify the elements of Microsoft Dynamics SL pre-installation

Gather resources needed to prepare for Microsoft Dynamics SL installation

Identify the basics of developing a Microsoft Dynamics SL implementation plan

Prepare the computer platform for Microsoft Dynamics SL installation

Identify the main elements of Microsoft Dynamics SL installation

Install Microsoft Dynamics SL

Set up new Microsoft Dynamics SL databases

Set up Microsoft Dynamics SL demo databases

Login to Microsoft Dynamics SL

Register Microsoft Dynamics SL

Set up Microsoft Dynamics SL clients

Identify the Microsoft Dynamics SL directory structure

Identify Microsoft Dynamics SL components

Identify the basics of all Microsoft Dynamics SL menu functions

Run Microsoft Dynamics SL modules and open Microsoft Dynamics SL windows

Navigate through the system and manage database records using Microsoft Dynamics SL

Set up Microsoft Dynamics SL printer services

Use Microsoft Dynamics SL standard and extended report options

Use Microsoft Dynamics SL online help system

Identify the different levels of system security used with Microsoft Dynamics SL

Define Microsoft Dynamics SL users and groups

Set up user and user group access rights

Change user passwords

Use inquiry and entity inquiry windows in Microsoft Dynamics SL

Use Microsoft Dynamics SL's copy and paste functions

Set up and use Microsoft Dynamics SL templates

Identify the basics of using recurring transactions in Microsoft Dynamics SL

Attach notes to data items

Track current Microsoft Dynamics SL user activity

Use the Microsoft Dynamics SL event log

Download and install Microsoft Dynamics SL update files

Identify the basics of on going system maintenance

Backup the Microsoft Dynamics SL database and system

Use the Database Maintenance Plan in SQL Server

Configure Windows Servers

Recommend SQL Server Settings

Identify bottlenecks

Utilize Windows Performance Monitor

Describe the basics of RAID arrays

Use Windows Performance Monitor for SQL

Set up an Application Server

Submit requests to an Application Server

Monitor requests made to an Application Server

Identify Microsoft Dynamics SL Supporting products

Identify the uses for Web Order

Set up ODBC data sources

Install Crystal Reports

Install FRx

Use Transaction Import

Identify problems and find sources of problems

Use tools and sources in Microsoft Dynamics SL to correct issues

Use SQL Server Profiler

Troubleshoot Microsoft Dynamics SL
